FOR IMMEDIATE RELEASE JULY 27, 2010

XCELIGHT™ Series 2 Overlay Panels FAA CERTIFIED

Global Aviation Technologies (GAT) of Wichita, Kansas has received FAA Certification of the XCELIGHT™ Series 2 Overlay panels STC ST01602WI.

The XCELIGHT™ Series 2 Overlay panel is a new, more robust and reliable overlay panel for the aviation industry. GAT has begun accepting orders of the XCELIGHT™ Series 2 Overlay panels which are a more durable, reliable, longer lasting, and cost effective alternative over the OEM replacement panels.

"The original equipment overlay panels are prone to warping, text fading due to normal wear, and scratches which emit unwanted light during nighttime flight operations. "Working with our supplier, we have brought to market a direct OEM replacement overlay panel which is scratch resistant, more durable, and will not exhibit color or text fading over time", says Woody Cottner VP Engineering.

The XCELIGHT™ Series 2 Overlay panel utilizes a patented pending process which allows all text and panel color to be placed under the surface. This process makes the panels easy to maintain and keep clean. Having the text and color beneath the surface, fading issues are now a thing of the past. The XCELIGHT™ Series 2 Overlay panels can be configured with an internal or external lighting source. The XCELIGHT™ Series 2 Overlay panels will work with 5 VDC,

28 VDC, or 115 VAC power. Retrofit is easily accomplished as the panels are a "plug and play" replacement for existing OEM overlay panels. For pricing, lead times and ordering details contact Candace Cottner, GAT Business Manager at 316-425-0999 or by email at candy@globalaviationtechnologies.com. The XCELIGHT™ Series 2 Overlay panel will be the last overlay panel your aircraft will need.

Global Aviation Technologies is an engineering consulting, and manufacturing company with aircraft maintenance capabilities, providing owners and operators of business and commercial aircraft with innovative, affordable and reliable component and avionics upgrades for their aircraft. GAT also provides wire harness manufacturing and electrical sub-assembly services for the commercial and military aviation industries.
