

FOR IMMEDIATE RELEASE

NANOSCALE ANNOUNCES LAUNCH OF NEW ODORKLENZ® PRODUCTS

MANHATTAN, Kan., November 17, 2009 – NanoScale Corporation (NanoScale®), a leader in advanced chemistry products, services, and technologies, today announced the launch of new products based on the revolutionary OdorKlenz® technology.

OdorKlenz Laundry Additive is used in combination with regular detergent to neutralize severe odors detergent alone cannot remove. OdorKlenz Laundry Additive is fragrance free, safe, and easy to use. It is effective against odors caused by a variety of sources. OdorKlenz Laundry Additive is available in both liquid and powder form and comes in a variety of sizes that can treat three to thirty loads of laundry.

OdorKlenz Skunk eliminates skunk or other malodors from your pets. The product does not contain any perfumes and can be applied easily, for immediate results. Made of a special blend of safe earth minerals, OdorKlenz Skunk has natural odor elimination properties without the need for perfumes or cover scents. The simple “Rub-in and Rinse-off” process provides immediate skunk odor elimination results.

SpillKlenz™ is an odor neutralizing spill absorbent that uses a destructive absorption process to eliminate odors instead of masking them with heavy perfumes or scents. SpillKlenz is available in bulk containers, canisters, and travel kits to simplify and eliminate odors and the hassle of cleaning up unexpected messes. SpillKlenz is available to schools, nursing homes, hospitals, veterinary clinics, restaurants, and hotels with a superior solution to deal with a variety of spills.

These new OdorKlenz products are now available on NanoScale’s recently launched OdorKlenz.com. Many of NanoScale’s consumer products are also available at Waters True Value Hardware store locations.

NanoScale Corporation develops and provides high performance advanced chemistry materials and related services to Customers worldwide. The Company holds a substantial intellectual property portfolio which includes its patented NanoActive®, FAST-ACT®, ChemKlenz®, OdorKlenz®, and SpillKlenz™ product lines and systems. NanoScale produces and sells a wide variety of NanoActive brand nanocrystalline materials in forms that include dry powders, granules, and liquid suspensions. FAST-ACT, ChemKlenz, and OdorKlenz Systems are sold for the prevention, containment, elimination, and remediation of toxic and noxious chemicals, odors, and biological releases. The Company’s Analytical Services Program offers a wide range of laboratory testing services and characterization methods to Customers. Additional information on the Company and its capabilities is available at www.NanoScaleCorp.com.
